SYSTEM REQUIREMENTS:

Pc fitted with Ethernet adapter, ADSL2/2+ connection

EAN CODE: 8716065232578

Wirelessly share your high-speed ADSL2/2+ connection

The EM4218 is a wireless modem (ADSL2/2+) offering a stable, wireless Internet connection. The EM4218 modem router can be used with an ADSL connection or with a super-speed ADSL2/2+ connection. Wirelessly share your connection with all of your friends, roommates or family members! Sharing Internet over a wired connection is possible too.

Assume you have a wireless network, but from the other rooms or from the garden you can not access it. Install the EM4218 as a signal booster to enjoy your wireless network wherever you want. Use the EM4218 in combination with an Eminent wLINK network for optimal results. By using the Eminent wireless networking adapters for your pc or notebook (wDESK, wNOTE and wBUS) you will also realise stunning data transfer speeds.

The EM4218 offers state of the art security with the high-tech data encryption and the unsurpassed firewall. Enjoy full Internet freedom without having uninvited guests taking a peek in your private data. A perfect solution. The Eminent EM4218!

- Modem router (annex a) for high-speed Internet over ADSL2/2+
