EMINENT

The Eminent EM7075 DTS hdMEDIA STREAM is the ideal companion for your Full HD Television. This all-round media player turns your living room into a movie theatre. Watching your HD movies is fun and easy, because the hdMEDIA STREAM is a very user-friendly device. Invite your friends and enjoy all your movies in Full HD quality!

The easiest way to play your media on TV in Full HD
Setting up the EM7075 hdMEDIA STREAM is extremely simple. Just connect it to your television using the included HDMI cable, and plug in your USB Storage device. Thanks to the high-speed USB 2.0 port, the EM7075 hdMEDIA STREAM allows unlimited access to your library of media files. Simply connect a USB stick or hard drive and display your media files on your television. The EM7075 hdMEDIA STREAM also supports a broad range of mass-storage devices like digital cameras, camcorders, and portable music players, allowing you to directly connect and view the media stored on them.

Access your files stored on your network
If you have your media files stored on a computer, or NAS device, you will love the networking support that we have integrated into the EM7075 hdMEDIA STREAM. The internal 10/100 LAN port allows you to quickly connect your home network and play files directly from your PC or other devices. Featuring full DLNA, UPnP and SAMBA support you will never have a dull moment in your home.

Simple and fast downloads
The network connection allows you to easily download all sorts of media files. The EM7075 comes with built-in Transmission and NZBget programs, and can download and extract files for you even if your PC is turned off!

Ultimate sound experience
If you have got a high-end Dolby Digital or DTS decoder, you can connect the optical cable for a full cinema experience with crystal clear digital audio.

Easy to choose your movies
Watching your HD movies has never been easier. The EM7075 hdMEDIA STREAM supports list & thumbnail modes to quickly find the file you need. Subtitles and digital audio tracks can be selected on the fly as your video is playing. The powerful Sigma Designs 8655 chips ensures crisp and fluid display of all your media, and even supports the upscaling of standard-definition video files so you can enjoy them on your HD or HD-Ready television.

Enjoy your own photo slide show with the music you like
The EM7075 hdMEDIA STREAM is also ideal for displaying your vacation photos or listening to music. You can select a few good tracks to listen to in the background whilst you play an automated slide show of your pictures with a variety of transitions. Your digital pictures never looked so good on television!

Supports all HD formats and codecs
Thanks to the Sigma Designs 8655 processor, the Eminent EM7075 hdMEDIA STREAM is more than capable of displaying high-definition formats like DivX, WMV9 HD, MP4, MKV (H.264) and VC-1 including Blu-Ray ISO (9/25/50Gb) & DVD-Rom ISO files at full HD 1920x1080 resolutions. You can use the EM7075 hdMEDIA STREAM **on any television.**
